

# Asbestos permit terms and conditions

Asbestos is a hazardous substance which can cause serious health implications. It needs handling with care and must be disposed of safely.

1. A permit is required for the disposal of asbestos from a domestic residential property only; this cannot be used for the disposal of commercial asbestos.
2. Permits are valid for disposal at Lynnbottom Recycling Centre only.
3. Permits allow disposal of up to 60kg of asbestos free of charge per household in a six-month period.
4. If you have more than 60kg to dispose of, the first 60kg is free of charge and anything over that weight is chargeable. See our website for up-to-date fees.
5. Asbestos must be in unbroken sheets.
6. Asbestos must be double bagged, and cable tied or securely taped in heavy duty plastic.
