1. What type of respondent are you?

Member of the public

2. What IPS vision and objectives policy are you commenting on

Policy CC1 Climate Change

3. Does your comment relate to a specific paragraph(s)? if yes which paragraph does this relate to?

no

4. In relation to the policy or paragraph you are commenting on, do you consider the Island Planning Strategy for submission to be legally compliant?

Yes

5. Please give details to support your answer to question 4

- **Yes_consistent_with_national_po**
- **Yes, complies with Duty to cooperate**

6. In relation to the policy or paragraph you are commenting on, do you consider the Island Planning Strategy for submission to be sound?

Yes - effective

7. If you answered no to question six is this because?

- **Not consistent with national policy**

8. What modifications do you think are needed to make the Island Planning Strategy legally compliant and/or sound?

Inclusion of adequate Solar power and suitably sized battery for every new build . That will add no more than ~£10,000 to every build. Less than 2-3% on an 'average' house. 10 panels minimum, 3.68 kWh Inverter and 5-10 kWh battery. That will give an approximate electric energy saving for an 'average' household of between £1,000 to £1600 per anum, depending on the cost of elecricity. The higher the cost of electricity, the bigger the savings. My current annual saving is ~ £1600 from a similar system.

9. Do you have any comments on the policies map?

no

10. If you wish to attach any documents please do so here

XLS [Annual stats 2024.xls](#)
12.5KB

11. Do you wish to request to appear at the hearing sessions that will take place?

No

12. Please outline why you would like to attend?

NA
