

# Six things you can do to help improve the beauty of the beach

... is for **Bag it**. If you take your dog to the beach, please pop that poop in a bag and throw it away

... is for **Environment**. Leaving litter can be lethal, not just to wildlife but also to the health of our beaches. Go on, don't deny bins their sole purpose in life!

... is for **Annoying birds**. When they flock for tasty morsels, they tend to poop (it must be the excitement of free food). The more you feed them, the more they come back and the cycle continues

... is for **Unblock drains**. Help keep the sewers in your area flowing. Flushing anything other than pee, poo and paper can cause blockages, leading to flooding

... is for **Team work**. We all have a part to play in improving our beautiful coastline. Why not get involved in local beach-cleans and litter picks?

... **Your home**. Misconnected drains and poorly located and maintained septic tanks can pollute surface water systems. By looking after your home you can improve your beach too!
