

Young Inspectors Critique of the Check it out APP 16th April 2015

Things to change:

- Listings to work without internet connection
- List to be made bigger and zoomable on iPad especially for those who are visually impaired as is currently unusable
- Separate category for Pharmacies & Chemists
- Information to be updated regularly
- Writing too faint and not big enough on google maps
- Directions on how to get to services to be included
- Services listed by town rather than alphabetically
- Events category – to link to county press events page/Isle of Wight Radio
- Sports category to be changed to Activities
- Categories to be different colours rather than just white/orange

Things to Keep

- Food & Drink category
- Shopping Category
- Events Category
- Healthcare Category

Things to Add

- News link – Isle of Wight Radio
- Public Toilets
- Activities Category - including short break activities with pictures, time, date, cost
- Symbols over writing like local offer website
- Emergency Services Category
- Travel Category – Bus, Train, Ferry, Taxi information such as timetables, bus numbers and where they go
- Notifications for events
- Live chat feature to be directly accessed from APP

| Categories Now | Keep ✓ or delete x | Categories to be added |
|----------------|--------------------|------------------------|
| Shopping | ✓ | Pharmacies & Chemists |
| Eat & Drink | ✓ | Activities |
| Events | ✓ | Emergency Services |
| Sports | x | Travel |
| Healthcare | ✓ | Public Toilets |

Comments:

- Would use this to find the nearest service as do not go out much and like to find things that are close to home
- Think it is a really good design for the first APP that has been developed

Website:

- White writing on pale blue background cannot be seen by those who are visually impaired. But white writing on an orange background is ok.
